# Hand Stretch Films

Hand stretch films are used for manual wrapping the loads.

We are able to produce manual film from **8 µm** to **35 µm** in thickness and widths of **250, 400, 450** and **500** mm, depending on the Customer's needs. Thanks to fully automated production lines, it is possible to pack stretch film into boxes of 6 pcs.

Hand films

Thickness	8-11 µm	12 µm	15-35 µm
Width	250, 400, 450, 500 mm	250, 400, 450, 500 mm	250, 400, 450, 500 mm
Net weight	0,7 - 4 kg	0,7 - 4 kg	0,7 - 4,5 kg
Stretchability	120% - 200%	150% - 250%	150% - 300%
Colour	transparent	transparent	transparent, black*, white*, blue**

Hand films extended core

Thickness	8-11 µm	12 µm	15-35 µm
Width	400 mm	400 mm	400 mm
Net weight	0,7 - 4 kg	0,7 - 4 kg	0,7 - 4,5 kg
Stretchability	120% - 200%	150% - 250%	150% - 300%
Colour	transparent	transparent	transparent, black*, white*, blue**

Mini-Rap

Thickness	8-35 µm
Width	100, 125 mm
Stretchability	120% - 250%
Colour	transparent, black*, white*, blue**

**Mini Rap stretch film** is an excellent alternative to adhesive tape. It is used to secure smaller loads.

## Available Refinements:

**Frozen**  
films resistant to low temperatures.

**Food**  
food safe films that may come into direct contact with it.

**OSC (High Slip)**  
Slippery films dedicated to the close storage of products. Prevents the phenomenon of „pallet sticking”.

**UV**  
the material shows increased resistance to UV radiation.

**High Cling**  
Increased stickiness of the film, a solution dedicated to confectioners.

**Product masking**  
The coloured films effectively conceal the contents of the cargo.
